

LibreOffice Installation Guide (Kali Linux)

Follow these steps to install LibreOffice and add a desktop icon on Kali Linux.

Step 1: Update Package List

Update your system's package index to ensure you get the latest version:

```
sudo apt update
```

Step 2: Install LibreOffice

Install LibreOffice and all its components:

```
sudo apt install libreoffice
```

Step 3: Add Desktop Shortcut

Copy the LibreOffice launcher to your Desktop:

```
cp /usr/share/applications/libreoffice-startcenter.desktop ~/Desktop/
```

Step 4: Make the Shortcut Executable

Set the correct permissions so the shortcut can be launched:

```
chmod +x ~/Desktop/libreoffice-startcenter.desktop
```

Note: If the desktop icon appears as a text file, right-click it and select Allow Launching.
